#### *Election/Restrictions*

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to a treated and isolated IgG fraction, classified in Class 424, subclass 130.1.
  - II. Claims 8-10, drawn to a method of providing bacterial static and viral static activity comprising oral dosing of a mammalian species with anti-bacterial and anti-viral composition, classified in Class 424, subclass 130.1.

The inventions are distinct, each from the other because of the following reasons:

- A. Groups I and II are related as product and process of use.

In the instant case, the isolated bovine IgG fraction can be used for various binding assays as well as anti-bacterial and anti-viral treatment as claimed. Therefore, they are patentably distinct.

4. Because these inventions are distinct for the reasons given above and the searches are not co-extensive, restriction for examination purposes as indicated is proper.

Art Unit: 1644
